The Poor are a Powerful Force in This Country
- Florida is home to 7.6 million poor and low-income eligible voters who make up 43% of the electorate.
- If poor and low-income eligible voters went to the polls at the same rate as higher-income voters, they would have the power to sway election outcomes in every state.

Obstacles to Full Democratic Participation
- The Supreme Court gutted the Voting Rights Act in 2013 and the Senate blocked a bill to restore these rights by a two-vote margin in 2022.
- Between 2020 and 2023, Florida state lawmakers introduced 9 voter restrictive bills and four have passed.

Political Debates Ignore Urgent Concerns
- A key factor discouraging poor and low-income people from voting: political campaigns that don’t speak to their issues.
- Not 1 of the 15 presidential debates in 2020 devoted even 30 minutes to poverty, the 4th-leading cause of death in America. Long-term poverty claims 295,000 lives every year, more than homicide, gun violence, diabetes, or obesity.

Florida Data on Interlocking Injustices Harming Poor and Low-income People

Poverty
- Between 2018-2020, 9.5 million Floridians were poor or low-income, accounting for 44.5% of the state’s population.
- In 2021, 3,886,000 children received the expanded Child Tax Credit and 1,303,000 low-wage workers received the expanded Earned Income Tax Credit.
- Since these pandemic programs have expired, poverty has been on the rise — proving that poverty is a policy choice.
Low Wages, Inequality, and Rising Costs

- To meet basic needs, two adults with two children need to earn over $25/hour. But at the state’s minimum wage of $11, an individual must work **111 hours*/week to afford a modest two-bedroom apartment.

- 41.9% of the state’s workforce **earns less than $15/hour** and 734,476 households were behind on rent or housing payments at the beginning of 2023.

- In 2021, all Republicans and 8 Senate Democrats **blocked** an increase in the federal minimum wage to $15, leaving it at $7.25 ($2.13 for tipped workers).

- Since 2017 Republican tax cuts, the 748 U.S. billionaires are **$2.2 trillion** richer.

Health

- 828,300 people are expected to **lose Medicaid** by March 2024 due to the end of pandemic protections.

- Florida’s **average life expectancy** dropped by 1.5 years between 2019 and 2020.

- 8.4 million workers, or 78% of the state’s workforce, do not have **paid leave**.

Climate Crisis Impact on the Poor

- Poor and low-income Florida households spend 6 times as much of their income on **energy costs** as the average household.

- Poor and low-income people are **bearing the brunt** of deaths and injuries due to climate change. Florida has had significant changes in precipitation patterns, with increased risks of flooding, drought, and water scarcity.

Militarism

- In 2023, the federal government spent **$1.1 trillion** on war and weapons, law enforcement, mass incarceration, deportations, and detention.

- In Florida, state taxpayer dollars for deportations and border control could instead subsidize **236,340 public housing units**. Taxpayer dollars for nuclear weapons could provide health insurance for **764,743 children**.

These facts underscore the need for a resurrection of justice, love, and truth — **not** an insurrection of injustice, lies, and hate.
